

CERTIFIED & QUALIFIED

ACCS is proud to support the automotive manufacturing industry by implementing the highly regarded **MSSC CPT** and **CLVCLT** certification programs in our community colleges.

The Manufacturing Skill Standards Council (MSSC) is an industry-led, training, assessment and certification system focused on the core skills and knowledge needed by the nation's front-line production and material handling workers, like those in the automotive industry. **MSSC** ensures competency in critical work functions of manufacturing and logistics, with ROI data showing 70 – 80% higher performance by those credentialed by **MSSC**. Companies can be confident that individuals hired with these certifications possess the core skills and capabilities they need to be successful.
