

Course Entry Point

The course entry point is the first area users see when they enter your course. The default course entry point is the Home Page and contains modules that alert students to activity in your course.

[More on the Home Page](#)

You can change the entry point.

The new entry point takes effect immediately for users who log in to the system after the change. Users who are in the system when the change takes place will see the new entry point the next time they log in.
