MAC Animal Hospital

Position: Veterinary Technician

Job Description

Responsibilities include, but are not limited to:

* Support veterinarians to ensure quality veterinary care, advocate for pets, and educate clients.

* Assist veterinarians to maximize productivity and maintain positive patient flow.

* Assist with surgeries and procedures.

* Communicate with clients about individualized pet health concerns and offer guidance on Wellness Plan options, medications, and additional treatments.

* Assist in maintaining relevant, comprehensive medical records with the support of practice systems.

* Obtain relevant health history and information from clients and maintain medical charts.

* Use safe restraining techniques following standard protocols.

* Maintain clean, sterile, organized treatment areas, exam rooms, and labs.

* Be willing to guide, mentor, and support fellow team members.

* Prepare surgical suite and surgical patients.

* Fill prescriptions.

* Performing laboratory work and diagnostic imaging.

* Providing compassionate care and a home away from home for boarded and hospitalized pets.
