Welding is a high-tech industry that can take you places all over the world. From ladders to aircraft carriers, from NASCAR to national defense, and from the laboratory to sales and repair, the varied welding industry impacts virtually every industry- technology is creating more uses for welding in the workplace.

Various welding credentials from the National Center for construction Education & Reserch (NCCER) will be awarded upon successful completion of the various welding classes shown here. NCCER curriculum correlates to the American Welding Society (AWS) SENSE(Schools Excelling through national Skills Education) Standards and Guidelines for Entry Welders.
