

## INDUSTRIAL MAINTENANCE TECHNICIAN

We are looking for a shop technician that is interested in fabrication, assembly, repair, and maintenance of industrial equipment and machinery. Self-motivation, mechanical inclination, problem solving skills, and trainability are traits we are looking for. You will be repairing industrial and distribution equipment as well as creating and implementing preventative maintenance programs. You must learn to read drawings and have some basic electrical knowledge. Experience with conveyors, packaging systems and electrical systems is a plus, but not required.

**\*\*Pay is dependent on experience\*\* and typically ranges from \$15-30 per hour. This is a mid-level position. The typical hours are 7 am-3 pm but can vary with overtime.**

### Responsibilities:

- Repair, install, and adjust industrial machinery and pipeline distribution systems
- Troubleshoot and repair defective equipment
- Perform routine preventative maintenance
- Able to create routine maintenance plans
- Respond to work order requests in a timely fashion
- Adhere to all safety policies and procedures

### Qualifications:

- Previous experience in machinery or other related fields
- Strong mechanical aptitude and troubleshooting skills
- Familiarity with industrial tools and equipment
- Ability to handle physical workload
- Detail oriented
- Excellent time management
- Valid driver's license and dependable transportation
- Ability to communicate with customers
