

Structural Autocad/REVIT Designer

Thompson Engineering – Leeds, AL

Thompson Engineering is looking for a structural Autocad / REVIT Designer to join our team in the Leeds, AL office. The Structural Designer I & II is an entry level position up through 5 years of professional work experience.

The Designer works closely with Structural Engineers and Architects to perform structural drafting assignments in either Autocad or REVIT.

The position requires learning Thompson Engineering's drafting standards and procedures for projects involving buildings, coastal piers and bulkheads, industrial support structures, deep foundations, and other similar structures.

The Designer should be well organized, have good verbal communication and problem-solving skills, and have a strong aptitude for follow-through.
