I am aware that during clinical/ laboratory experiences there may be a risk of exposure to various communicable/ transferable disease or illnesses. The College will provide instruction regarding safe health care practices when caring for patients with communicable/transferable conditions. However, my personal protection against these conditions, that is, following safe health care practices for self and patients and becoming immunized when available, is my responsibility. I must consult with my own physician or the Department of Public Health for assistance or advice regarding immunizations or protection for conditions other than the tests and immunizations included in this physical. I understand that my personal protection against communicable/ transferable conditions is my responsibility. The physician performing this physical examination has permission to release the findings to the JSCC Nursing Education Program.

Medical information may be released to clinical affiliates. I attest that this information is true. I am aware that falsification of results will result in disciplinary action which may include dismissal from the Nursing Program.

NOTE: *Additional medical examinations and a specific release from a physician may be required at any time (for example, during pregnancy, infectious disease, interference with mobility, emotional instability, etc.) if it is deemed necessary for the faculty to evaluate the state of health.*

PHYSICAL EXAM: Students are expected to be in good health as they will deal directly with patients in health care settings. The Nursing Education Program requires proof of a satisfactory level of health and may require proof of physical ability to meet program Essential Functions. Admission or progression may be denied if a student's level of health is unsatisfactory or if physical limitations prevent a student from maintaining personal or patient safety during campus and clinical laboratories. Students are expected to be physically fit to undertake clinical assignments, be free of chemical dependency, and be mentally competent.

******Based on the history and your examination,** is this student's mental and physical health sufficient to perform the classroom and clinical duties of a Nursing student?
